

## Environmental Health

Food and lodging inspections, soil evaluations, water samples, lead investigations, day care inspections, and public swimming pool inspections

## Animal Control

Rabies control, animal adoption, pick-up of stray cats and dogs, neglect and cruelty investigations, and quarantines for dog bites

## Communicable Disease

The Health Department is involved in controlling the spread of communicable diseases. We respond to reported outbreaks by surveillance and investigation of communicable diseases in our area.

## Preparedness and Response

Through our Public Health Preparedness & Response (PHP&R) program, we aim to work with our communities to keep everyone safe and prepared for any disaster, along with local emergency management partners and response agencies.

## Healthy Greene ~ a certified Healthy Carolinians Partnership

Healthy Greene is a community partnership dedicated to promoting wellness and improving the quality of life for all Greene County residents. Healthy Greene currently addresses three priority areas: Health Promotion, Injury, and Chronic Disease.

*Everybody*

## Maternal Health

Prenatal and nutritional education, WIC, planning for delivery, postpartum follow-up and care, referral for family planning services, newborn care, immunizations, and prenatal care to include 24-hour medical coverage per telephone services with ECU Family Practice

## Child Health

Well-child assessments, sick care visits, kindergarten assessments, day care physicals and sports physicals provided by the Pediatrician from ECU Pediatrics

## Maternity Care Coordination

Assists pregnant women – with Medicaid – in defining and addressing a variety of needs throughout their pregnancy; develops a care coordination plan that outlines how the client can best meet her needs and those of her family

## Child Service Coordination

Provides developmental screening, refers parents to other needed services, focuses on the family and their needs, assures that children receive routine medical care and immunizations, and identifies infant and children at risk for chronic illnesses or developmental delays

## Healthy Start Baby Love Plus

Helps women and their families increase the chances of having healthy and happy babies; provides information about low or no cost prenatal services and transportation to a clinic or doctor's office for prenatal appointments

## Women's Health

Provides breast exams, pap smears, screening for high blood pressure, diabetes, pregnancy, STDs and HIV, and individual counseling sessions with a RN and FNP regarding available contraceptive methods, including emergency contraception, or other pertinent reproductive issues

## Be Smart Program

Family Planning Waiver Medicaid now available and being accepted for women aged 19-55 and men aged 19-60 that are legal residents, at 185% of the federal poverty level, and that have not had surgery to prevent pregnancy. This program provides coverage for exams, contraception, pregnancy, STD screening, and voluntary sterilizations.

## Breast and Cervical Cancer Control Program (BCCCP)

Provides free breast and cervical cancer screening, mammograms, and follow-up services for income eligible women aged 50 and above, and also to symptomatic women below the age of 50

## STDs (Sexually Transmitted Diseases)

STD screening to include HIV, gonorrhea, chlamydia, and syphilis

## TB Control Program

Routine Tuberculosis (TB) screening and high-risk screening for identification and treatment of individuals found to have suspected TB disease in order to prevent further spread of the disease. The goal of the TB Control Program is to eliminate TB disease.

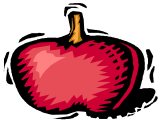

## Immunizations

Immunizations provided for children and adults ~ examples of immunizations include: Tetanus, Flu and Pneumonia, and Hepatitis B

Greene County Health Department utilizes the North Carolina Immunization Registry. The registry enables public and private health care providers to consolidate and maintain computerized immunization records on all children and adults within a given geographic area.

## WIC (Women, Infants, and Children)/Nutrition

Provides nutrition education, breastfeeding promotion and support, referrals to other health and community resources, and vouchers for healthy foods to income eligible pregnant/postpartum women, infants, and children up to age 5

## Health Promotion

Focuses on developing and implementing community and school-based health promotion programs concentrating on policy and environmental level changes that promote and support physical activity, healthy food choices, and tobacco use prevention and cessation

## Health Education

Provides education about self-breast exams, pregnancy prevention, prenatal care, breastfeeding, and car seat safety; community education is also provided on various topics to groups within the community

## Dental Hygiene

Dental assessment of Kindergarten and Fifth Grade students including referrals, dental health education and instruction in elementary schools, and promote dental health, fluoridation, dental sealants, and access to dental care
